

## **The Owl Oracle**

### **May 8, 2015**

- We are in desperately short supply of tissues, thanks to the allergy season! Please consider sending in a box or two. Some of us are going through a box a day with all the sneezing!
- Proctors are needed for all testing days.

Selfridge Science: We are beginning our review for the state science exam, which will be Friday, May 22 . We will also have an in class final exam on Friday 5/15. PDF review packets (which we will be working on in class) and all the kahoots from this year will be available in google classroom.

Williams Social Studies: We are finishing a mini-unit on the Middle Ages. There will be a brief open-note quiz on Monday, 5/11, but the big grade is a Manor Project students started on Wednesday 5/6. After this unit, we will begin review for the state Social Studies Test.

Stanfield Math:

We are finishing Area of Shapes this week, moving to Surface area, Volume, and Algebra next week. I will be putting all of our EOG Prep Quiz/Assignments on Google Classroom for the students to continue to drill. I will also put an EOG release test for practice. These can be accessed at home. Continue to encourage the students to finish strong! We have very little time left, and many of the students seem to be "quitting" somewhat. We are so close! Lastly, we are in great need of Proctors for the EOG tests. If anyone is willing and able to help out, that would be fantastic!

Stark Language Arts: We are in the midst of our EOG review. I am still in need of more candy for rewards during these weeks. It needs to be individually wrapped and peanut –free; Jolly Ranchers and Starbursts are ideal. Please encourage your student to give 100% effort in the next few weeks to demonstrate the ability/skills necessary to go to 7<sup>th</sup> grade. There are a

number of students who are possibly eligible for Honors next year, but we are waiting to see EOG scores to finalize placement. Look for assignments on GoFormative, Google Classroom, and details on my weebly.

Mohorter Math and Science - We have begun EOG review. Please check my Weebly for a review calendar and information regarding review assignments.

<http://kmohorter.weebly.com/>

All science review materials are located on the Google Classroom. Students should bring devices to Science each day that can connect to the Internet (if they have them). Math students have received an end of year review packet.

Our classroom is in need of tissues and sanitizer.

Combs- Social Studies- In social studies we will be starting renaissance as well as reviewing and taking practice exams. Students are always encouraged to read on their own and review everything we have studied from early humans to the renaissance.

Combs-Language Arts- In language arts we have started EOG review students should have a new list of EOG vocabulary words each week. We will be taking practice EOG exams leading up in the next few weeks leading up to the actual test.
