

## Diabetes Supply Checklist

The following items should be brought to school on, or before, the first day of school:

- A completed Diabetes Care Plan & Healthcare Provider Order for Student with Diabetes
- A completed **CGM calibration letter(if needed)**
- Up to date parent/guardian and emergency contact information
- Glucometer, strips, batteries and lancets
- Completed Glucometer Maintenance form stating who will be responsible for doing control checks
- Insulin pen or vial and extra needles and/or syringes
- If student uses insulin pump and/or CGM: extra insulin, sites, tubing, Pods, sensors, batteries, tape, etc. (should the pump or CGM fail) **\*School Nurses do not change infusion sets or sites**
- Ketostix for urine ketone testing
- Glucagon
- Glucose gel/tablets and/or cake decorator icing/gel
- 15g fast acting carbohydrate snacks for low blood sugar treatment (remember to replenish as needed)
  - 4-6 oz Juice boxes
  - 6 oz regular soda
  - Fruit-roll ups
  - Raisins
  - Skittles
- Other needed snack items (remember to replenish as needed)
  - Cheese crackers
  - Peanut butter crackers
  - Cheese sticks
  - ½ turkey sandwich

A plastic pencil box or large Ziploc bag marked with student's name is a convenient way to store snacks and supplies in each of your child's classrooms as well as in the health room.

*\*Parents/guardians are responsible for checking and replacing snacks and supplies.*

**Remember: The school cafeteria is only open during breakfast and lunch times.**
